

EVENT TYPE

The Event Type is in the following screens:

Crisis and Placement/Profile

Admission/Profile

Encounter Note

TAP/Client Profile (The TAP module is not always used.)

The Event Type ties the service (Encounter Note) in with the Event Type and Dates listed on the Profile screens.

Example from the Admission/Profile screen:

Event Type	Placement Screening/OWI
Admission Date	
Placement Screening Date	12/6/2006
Crisis Intervention Date	

So if the client had their Admission/Profile screen entered as it is in the following example, then there would be at least one Encounter Note with an Event Type of Placement Screening/OWI on 12/6/2006 and another Encounter Note with an Event Type of Admission on 1/5/2007.

Event Type	Admission
Admission Date	1/5/2007
Placement Screening Date	12/6/2006
Crisis Intervention Date	

All corresponding Encounter Notes entered after 1/5/2007 would all have an Event Type of Admission, whether the client had a crisis, individual, group or family session.

Definitions of the Event Types:

Crisis Intervention = Non-Client Crisis (Client does not have a current Evaluation with ASAC.)

Placement Screening/OWI = Evaluation Status (Client is NOT admitted to treatment.)

Admission = Admit Status (client is currently/actively participating in treatment services at ASAC.)
